

TONER LOW bio

Toner Low is a doom/stoner band from Leiden, the Netherlands, that released three studio albums so far. The band started in 1998 with a mix of stoner, space and guitar rock, but over the years brought the lowest frequencies up and the tempos down. Like their previous full-length releases -- Toner Low and II -- their album III got received very well in the international doom and stoner community. The band also released a download live album and a compilation with demo, split 7-inch and sampler CD recordings.

'This album is going to be considered a landmark release in the years to come. If not then there is no justice in the world. Brilliant. Amazing.'

'Get over to their Bandcamp now to purchase this landmark and essential release in the world of heavy music.'

(HeavyPlanet.net)

'Ill winds up a listen that satisfies as much as it pummels.'
